

# Richmond Conveyors

## SHINGLE-VATOR

Heavy duty yet economical rooftop delivery equipment. Choose from electric or hydraulic models in lengths of 12' - 24'

Shingle-Vator's design makes your job site maneuvering easy with greater versatility.

Removal and installation from your truck is simple and safe.

- ▶ Conveyor frame is constructed of one piece heavy gauge aluminum.
- ▶ All units come standard with CA-550 roller chain and stainless steel paddles for longer product life and less maintenance.

- ▶ All units are constructed with heavy duty greasable bearings for longer product life and less maintenance.

## Hydraulic Shingle-Vator

- ▶ Hydraulic operations include lift to rooftop and shingle delivery in both forward and reverse.
- ▶ Hydraulic units rotate manually.
- ▶ Controls are located for convenient and safe operation of the conveyor.

- ▶ Hydraulic Shingle-Vator will provide increased delivery time due to a greater load capacity.
- ▶ The hydraulic Shingle-Vator comes with variable speed control and
- ▶ Electric Shingle-Vator comes standard with reverse and maximum load carry capacity of two bundles of shingles at once.

## Electric Shingle-Vator

- ▶ Both the electric and hydraulic units come standard with the Richmond Truck Mount System™ (TMS).
- ▶ Electric units are raised to the rooftop with a heavy duty manual pump jack.
- ▶ Electric units rotate manually.

**SHINGLE-VATOR**

Shingle-Vator is a lightweight, yet strong and durable shingle conveyor that can be easily removed and installed on your truck

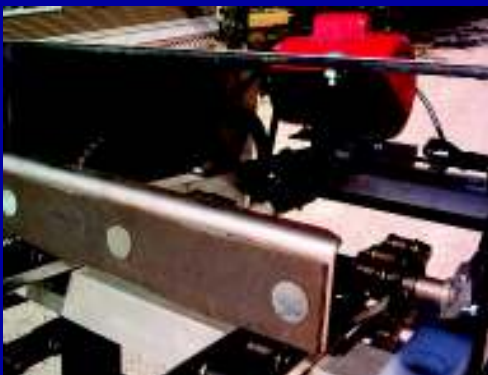

Step 1  
Remove bolt from pocket.

Step 3  
Remove conveyor  
with a fork truck.

Step 2  
Swing unit out to side or rear of  
truck bed and level.

- ▶ Both electric and hydraulic units come standard with deluxe roof support.
- ▶ Stand bulkhead support shown.

### Available Options

- ▶ Extra pockets can be ordered for multiple truck applications.
- ▶ Removable bulkhead supports.
- ▶ Hydraulic upgrade - operates off truck existing PTO used for the dump bed.

**SHINGLE-VATOR**
