- Idle Control
- Customized Logo
- Storage Rack

Richmond

Conveyor

- CA 550 Roller chain for long life & less maintenance
- Large reinforced paddles for increased durability

- All components and bearings are heavy duty and greasable for longer life and durability

- All sections are made of heavy gauge stainless steel
- Units are constructed in sections and can be repaired without replacing entire unit

All units are standard with the following hydraulic operations

1. Rotation
2. Raise and lower to roof
3. Telescoping post
4. Conveyor operation with reverse and variable speed control

- Telescoping post will allow up to 18" of additional height for increased truck bed space and storage capacity
- Adjustable roof stand adapts to many roof pitches and heights

- Convenient control location for safer operation
- Optional storage racks available for all models

- Ultimate allows for maximum shingle delivery to increase efficiency
